

## Chic Chameleon Bio

Chic Chameleon was born out of an accumulation of years of dreaming, tons of effort, and a lot of hard work. Using the tools I acquired throughout a university composition degree and with a passion for writing, I embarked on my lifelong mission to create music that others could connect to. The project has been influenced by bands such as Radiohead, U2, Beach House, and Slowdive and I'd like to categorize our sound as Indie Rock with Shoegaze and Post Rock influences. With lots of material written over four years, this band brings a fresh new flavour of melancholy music to the Alberta scene.
